

The first wind turbine foundations of the Rentel offshore wind farm have been installed

The first wind turbine foundations of the Rentel offshore wind farm in the Belgian North Sea have been installed! Works have been carried out by Dredging International and installation jack up 'Innovation'.

The kick off of the realization of the off shore wind park featuring 42 turbines with a total capacity of 309 MW – enough renewable energy to supply green energy for about 300.000 households in Belgium and contributing to the country's 2020 climate goals.
